

KARIMULLA SHA KHADEER SHAIK

Vijayawada, India

+91 9032901359 | karimulla01359@gmail.com | [GitHub Profile](#)

SUMMARY

Final-year Computer Science student specializing in backend development and AI-driven systems. Experienced in building and deploying scalable REST APIs, implementing end-to-end features, and developing intelligent automation solutions using Java, Spring Boot, and Python. Strong foundation in data structures, system design, and problem-solving, with a focus on writing clean, maintainable, and production-ready code.

EDUCATION

Andhra Loyola Institute of Engineering and Technology — Vijayawada, India
B.Tech in Computer Science and Engineering (Data Science) | 2022 – 2026

TECHNICAL SKILLS

- **Languages:** Java, Python, SQL
 - **Frameworks & Libraries:** Spring Boot, Scikit-learn, Pandas, NumPy
 - **Web & APIs:** REST API Development, JSON, Postman
 - **Databases:** MySQL
 - **Core Concepts:** Data Structures, Algorithms, OOP, System Design
-

PROJECTS

NextGen AI Chatbot

[GitHub Link](#)

Python, Gemini API, Generative AI, NLP, Flask

- Developed an AI-powered chatbot using the Gemini API to generate intelligent and context-aware conversational responses
- Built an interactive frontend for real-time communication between users and the AI system
- Integrated natural language processing and prompt engineering techniques to improve response quality and user experience
- Designed a modular and scalable application architecture for future AI feature enhancements

AI Resume Analyzer

[GitHub Link](#)

Python, Streamlit, NLP, PDF Processing, Machine Learning

- Developed an AI-powered resume analysis system to evaluate resumes and match candidates with relevant job roles
- Implemented PDF resume parsing and skill extraction techniques using NLP methodologies
- Built a job-role matching engine with automated match score generation based on candidate skills
- Designed a recommendation system suggesting suitable job opportunities from resume insights
- Generated downloadable PDF reports containing resume analysis and candidate evaluation results

Telecom Customer Churn Prediction System (*Python, Scikit-learn, SQL*)

[GitHub Link](#)

- Built a machine learning model to predict customer churn and support retention strategies
- Achieved ROC-AUC score of 0.85 through feature engineering and model optimization
- Processed and analyzed large datasets using SQL and Python to extract actionable business insights
- Visualized key trends and patterns to assist in data-driven decision-making

EXPERIENCE

Cyber Security Intern — Supraja Technologies

May 2024 – Aug 2024

- Identified and analyzed vulnerabilities aligned with OWASP Top 10, improving application security and reducing potential risk exposure
- Performed penetration testing using Burp Suite, OWASP ZAP, and Nikto, uncovering multiple security gaps in web applications

CERTIFICATIONS

- Data Science for Engineers — NPTEL, IIT Madras
